Press release

Large contract award for TELEFUNKEN in Ulm

Austrian Army procures new VHF – Radio Equipment

TELEFUNKEN, has been successful in maintaining its position by winning a large project for the Austrian Army. The Company, based in Ulm Germany was awarded the contract amongst fierce and intensive international competition for it's VHF – Field Radio Communication System type CNR-9000 and PRC-710 and was considered as best Vendor by the Austrian Ministry of Defense.

The contract valued at considerably over 60 Million Euros includes, in addition to the delivery of in excess of five thousand latest generation (state of the art) digital radios, the required infrastructure and technical support centers and will span over the next five years.

The Austrian Army has therefore taken the quantum leap from the world of analogue speech controlled radios into the dimension of digital, encrypted and meshed radio networks.

TELEFUNKEN has engaged a considerable amount of Austrian Companies as subcontractors for the implementation of this project.

TELEFUNKEN is a German medium sized company with approx. 80 employees. Focal points of the company are the development, project implementation and integration of radio communication systems for Military and Para-military as well as Public high speed rail applications.

TELEFUNKEN was founded in 2003 after being part of the EADS Group and is now part of the internationally renowned Elbit Systems Ltd Corporation.

The commitment and dedication of the team involved has lead to this achievement which will benefit future strength and growth for TELEFUNKEN in this sector.
